

PRIVATE TRANSPARENCY REPORT

2023

First Eagle Alternative Credit, LLC

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The private Transparency Reports, which are produced using signatories' reported information, support signatories to have internal discussions about their practices. Signatories can also choose to make these available to clients, beneficiaries, and other stakeholders.

This private Transparency Report is an export of your responses to the PRI Reporting Framework during the 2023 reporting period. It includes all responses (public and private) to core and plus indicators.

In response to signatory feedback, the PRI has not summarised your responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options that you selected are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

SENIOR LEADERSHIP STATEMENT

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

First Eagle Alternative Credit believes that the thoughtful and deliberate incorporation of environmental, social and governance (ESG) factors into our investment process, combined with active, constructive engagement with managements, enables us to make better informed decisions and is integral to meeting our fiduciary responsibility. To this end, we consider material ESG factors in the course of our due diligence, credit research, security selection, underwriting process, portfolio oversight and risk management for all our debt investments, to the extent reasonably practical under the circumstances.

As fixed income investors, we are focused on mitigating downside risk. At the core of our investment process is the systematic identification and evaluation of a myriad of credit risk factors that can impact the long-term sustainability of business models and the earnings potential of companies. We believe that thoughtful consideration of ESG risks ultimately leads to more complete downside protection and integrate ESG considerations into our evaluation for all our debt investments.

Our proprietary environmental, social and governance research process is fully integrated across both private credit and syndicated loans and is conducted by our research teams who are also responsible for the fundamental credit analysis and industry research. This process is anchored by three key pillars: Engage, Score, and Update. During initial underwriting, we directly engage with borrowers by sending our investee companies and their owners and advisors an ESG Questionnaire and collecting responses. We incorporate publicly available information to meet any disclosure gaps and use the data collected to create a company specific ESG Scores, Ratings and ESG Momentum and Climate Risk Indicators. This analysis along with relevant analyst commentary and conventional credit risk data is captured in our proprietary database and included in our core investment memos. Information is refreshed either annually or in the event of an ESG incident. Relevant information is discussed during our internal investment committee meetings.

Recently, we have seen an increase in demand for our fixed income portfolios to meet both financial and non-financial objectives, including requests to incorporate positive or negative screening and requests to report certain fund-level ESG and Climate Risk datapoints, when available. With our robust proprietary research practices in place, we are well positioned to meet these client requests. Our internal centralized database and reporting tool, which creates transparency into our ESG scoring and analyses for each issuer, allows us to identify progression or regression against key ESG initiatives and to provide our clients enhanced reporting for their portfolios

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

First Eagle Alternative Credit has refined its ESG analysis and incorporation processes to support and align to what we believe are industry best practices and to respond to client demand for positive and negative screening in private debt mandates. Importantly, this ESG analysis and incorporation into our process spans both our fixed income and private debt strategies today.

When we joined the PRI in September of 2018 and developed our ESG Investment Framework, we used an internally developed proprietary questionnaire. This past year, we refined our engagement and scoring methodology by adopting an industry standard template from the ESG Integrated Disclosure Project. Our objective was twofold; to promote greater harmonization and consistency of disclosure of ESG key indicators by borrowers in private credit and syndicated loan transactions and to facilitate the reporting process for our investee companies. To learn more about the ESG IDP, please visit: <https://www.esgidp.org/>.

We also enhanced our internal scoring and reporting tool to track sector-specific datapoints influenced by the SASB Materiality Map, when data is available, and allow for analysts to tag individual borrowers for positive and negative screening considerations.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

First Eagle Alternative Credit management has identified several initiatives to improve and advance our commitment to responsible investment in 2023/24.

- Management has sought to deliver investment products tailored to clients seeking portfolios which explicitly incorporate a discrete ESG process and risk assessment framework into the fundamental credit research process.
- We have incorporated criteria into a mandate for a new private credit vehicle which includes discrete and binding gender diversity objectives. We continue to advance our understanding of SFDR regulation and related fund structures in the private credit space to address client product needs, as those arise.
- We continually evaluate our engagement with our peers and potential membership in industry organizations focused on responsible investment advocacy such as the Institutional Investors Group on Climate Change, and the ESG IDP Working Group.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

ESG NOT INCORPORATED

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
OO 16	CORE	OO 11, OO 12–14	N/A	PUBLIC	ESG not incorporated	1

Describe why your organisation does not currently incorporate ESG factors into your investment decisions.

Internally managed
(G) Fixed income – securitised

We are continuing to evaluate the best approach for us to evaluate ESG considerations in connection with investments in collateralized loan obligations (CLOs). We have been active with the Loan Syndications and Trading Association (LSTA) in developing a standard ESG questionnaire for this purpose. Since CLO securities represent less than 1% of our assets under management, we have prioritized other areas of our business (specifically, private debt) in the past year.

ESG STRATEGIES

FIXED INCOME

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

- (C) We incorporate human rights–related risks and opportunities into our assessment of expected asset class risks and returns
- (D) We incorporate risks and opportunities related to other systematic sustainability issues into our assessment of expected asset class risks and returns
- (E) We do not incorporate ESG factors, climate change, human rights or other systematic sustainability issues into our assessment of expected asset class risks and returns
- (F) Not applicable; we do not have a strategic asset allocation process

STEWARDSHIP: OVERALL STEWARDSHIP STRATEGY

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 22	CORE	OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

For the majority of AUM within each asset class, which of the following best describes your primary stewardship objective?

(2) Fixed income

(A) Maximise our portfolio-level risk-adjusted returns. In doing so, we seek to address any risks to overall portfolio performance caused by individual investees' contribution to systematic sustainability issues.

(B) Maximise our individual investments' risk-adjusted returns. In doing so, we do not seek to address any risks to overall portfolio performance caused by individual investees' contribution to systematic sustainability issues.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 23	PLUS	OO 5, OO 8, OO 9	N/A	PUBLIC	Stewardship: Overall stewardship strategy	2

How does your organisation, or the external service providers or external managers acting on your behalf, prioritise the investees or other entities on which to focus its stewardship efforts?

As a part of our standard environmental, social, governance, and climate research process, our investment teams engage with the respective investees on material risk factors. Typically the engagement consists of our teams sending a questionnaire (ESG IDP alignment) to the management team to collect responses on a pre-set list of E, S, G, and Climate topics.

Our organization typically prioritizes the investees on which to focus stewardship efforts in two instances.

First, when responses are low quality and reflect under-investment in key environmental, social, governance, or climate functions that may expose the business to operational or financial risk, our investment teams may attempt to engage with the Company to emphasize the importance of these matters and influence positive momentum as it relates to internal resource allocation and disclosure quality.

Second, when responses indicate an investee has a track record of material business or financial disruptions due to E, S, G, and Climate factors, our investment teams may prioritize engagement with the investee to understand what drove the disruptions and what steps are being taken to remediate the impacts / risks go forward.

How are your organisation’s stewardship activities linked to your investment decision making, and vice versa?

First Eagle Alternative Credit believes in engaging with issuers as a core pillar of our proprietary research process. The insights from these engagement efforts inform investments across both our tradable credit and our direct lending platforms. As a fixed income investor, our borrowers often need to come back to the market to manage their capital structures, and a borrower’s cost of capital will depend on investors’ perception of risk. As ESG factors become increasingly more important to clients, employees, suppliers, vendors, and ratings agencies, ESG factors will directly affect the business and financial risk profile of our borrowers and the associated cost of raising capital for these companies. Given this connection between the ESG and the capital markets, FEAC coordinates engagement across the firm to ensure we are directing our borrowers, which we view as partners, towards practices that are sustainable over the long term.

We manage a range of portfolios designed to target traditional risk-adjusted returns while also targeting improved ESG objectives. Our approach generally is to engage with management teams directly during the syndication/origination process and annually thereafter. The initial engagement is guided by our ESG questionnaire, and the follow-on engagements are guided by an abbreviated questionnaire/script for investment team members to follow. The standardization of these processes allows for comparability across borrowers, sectors, and portfolios. While we seek standardization across our portfolio stewardship, we also continually look to reevaluate the applicability and effectiveness of our questionnaire and script, which have gone through numerous revisions. Our ability to compare these variables allows us to identify and assess risk and opportunity across a wide spectrum of borrowers. We aim to identify a fixed income strategy that minimizes ESG-related risks but also capitalizes on ESG-related opportunities, so long as they align with our client needs. The datapoints and insights garnered from these engagement initiatives inform our credit investment stance via inclusion in our credit write-ups, discussions in our investment committee meetings, and tracked in our proprietary credit tracking platform.

STEWARDSHIP: ESCALATION

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 37	CORE	Multiple, see guidance	N/A	PUBLIC	Stewardship: Escalation	2

For your corporate fixed income assets, what escalation measures did your organisation, or the external investment managers or service providers acting on your behalf, use in the past three years?

- (A) Joining or broadening an existing collaborative engagement or creating a new one
- (B) Publicly engaging the entity, e.g. signing an open letter
- (C) **Not investing**
- (D) Reducing exposure to the investee entity
- (E) **Divesting**
- (F) Litigation
- (G) Other
- (H) In the past three years, we did not use any of the above escalation measures for our corporate fixed income assets

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle

Describe your approach to escalation for your internally managed SSA and/or private debt fixed income assets.

(B) Private debt - Approach to escalation

Our escalation for our private debt investments would consist of either 1) passing on an investment or 2) privately engaging an issuer once an issue has been identified.

STEWARDSHIP: ENGAGEMENT WITH POLICY MAKERS

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 39	CORE	OO 8, OO 9	PGS 39.1, PGS 39.2	PUBLIC	Stewardship: Engagement with policy makers	2

Did your organisation, or the external investment managers or service providers acting on your behalf, engage with policy makers as part of your responsible investment approach during the reporting year?

- (A) Yes, we engaged with policy makers directly
- (B) Yes, we engaged with policy makers through the leadership of or active participation in working groups or collaborative initiatives, including via the PRI
- (C) Yes, we were members of, supported, or were in another way affiliated with third party organisations, including trade associations and non-profit organisations, that engage with policy makers, excluding the PRI
- (D) We did not engage with policy makers directly or indirectly during the reporting year beyond our membership in the PRI

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 39.1	CORE	PGS 39	N/A	PUBLIC	Stewardship: Engagement with policy makers	2

During the reporting year, what methods did you, or the external investment managers or service providers acting on your behalf, use to engage with policy makers as part of your responsible investment approach?

- (A) We participated in 'sign-on' letters
- (B) We responded to policy consultations
- (C) We provided technical input via government- or regulator-backed working groups
- (D) We engaged policy makers on our own initiative
- (E) Other methods

Describe:

We participate in industry-related forums/panels and occasionally respond to policy consultations. Our dedicated efforts this year were focused on the support of the ESG IDP Project. We have participated and provided document feedback on LSTA Working Groups that have worked on the LSTA ESG IDP Questionnaire and CLO manager Questionnaire. As a part of these working groups, peers across the credit industry share insights and perspectives for how to accelerate ESG adoption in the credit markets. These include encouraging borrowers and sponsors to voluntarily disclose more robust ESG scoring, introducing new documents/processes into broader leveraged loan practices and sharing pain points.

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 39.2	CORE	PGS 39	N/A	PUBLIC	Stewardship: Engagement with policy makers	2

During the reporting year, did your organisation publicly disclose details of your engagement with policy makers conducted as part of your responsible investment approach, including through external investment managers or service providers?

- (A) We publicly disclosed all our policy positions
- (B) We publicly disclosed details of our engagements with policy makers
- (C) **No, we did not publicly disclose details of our engagement with policy makers conducted as part of our responsible investment approach during the reporting year**

Explain why:

Our work was in collaboration with industry groups not an individual engagement.

CLIMATE CHANGE

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41	CORE	N/A	PGS 41.1	PUBLIC	Climate change	General

Has your organisation identified climate-related risks and opportunities affecting your investments?

- (A) **Yes, within our standard planning horizon**

Specify the risks and opportunities identified and your relevant standard planning horizon:

Our Climate Risk analysis focuses on a borrower's exposure to climate risks within our standard planning horizon. These risks include physical and transition risks.

Physical risks could include damages to buildings and infrastructure or disruption of business operations due to forced or preventative closure. Transition climate risk is equally as important and, in some cases, can be more important to specific borrowers. FEAC identifies transition risk as all the potential negative impacts as a result of climate risk to the company's operations. This could include regulation risks (changes in regulation/market structures as a result of climate risk), litigation risks (failure to provide/deliver service due to outages), competitive risks (competitors without exposure to climate risks gaining more share), production risk (shortfalls due to climate events), and/or reputational risks (unreliable customer or supplier due to climate events).

As a part of our standard engagement and diligence process, our investment teams identify and assess a company's physical climate and climate transition risk exposure during the holding period, while also assessing the quality of policies and procedures that may exist to offset the potential impacts during this hold period. These may include items such as business plans to grow away from segments exposed to risk, existence of business interruption insurance policies, existence of redundant capacity, or other disaster recovery strategies, etc.

This analysis is included in each investments write-up, and if relevant, will be discussed at the time of investment and monitored during an investment holding period.

(B) Yes, beyond our standard planning horizon

Specify the risks and opportunities identified and your relevant standard planning horizon:

Our climate risk analysis also assesses the potential risks that extend beyond our standard planning horizon. This risk is most often expressed via the form of stranded assets that may be exposed to permanent disruption and potential refinancing risk. We view stranded asset risk to be largely tied to three change factors: economic (long term changes in relative costs/prices), physical (extreme/changing weather or environmental conditions), and regulatory (changes in policy that alter the competitive landscape). In the event that our investment teams identify an industry or asset that has stranded risk, this will be discussed and may be integrated into our shorter-term investment making decisions.

- (C) No, we have not identified climate-related risks and/or opportunities affecting our investments

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
PGS 41.1	CORE	PGS 41	N/A	PUBLIC	Climate change	General

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

As a fiduciary to our clients, our responsibility is to preserve and grow our clients' assets. In order to adequately position our clients best, we take the approach that factoring in climate-related risks and opportunities is vital to be a competent and competitive investment manager.

As many investment managers are now aware, climate risk is investment risk and FEAC's ESG policy recognizes a detailed climate risk analysis as a fundamental part of our ESG philosophy.

FEAC now uses a variety of methodologies and data points to seek to triangulate climate change risks and opportunities for potential investments. Throughout the investment process, analysts utilize public information, company provided information, industry data points, independent Sustainalytics metrics and data, ratings agencies, peer information and other resources to assess climate risks and opportunities. FEAC's climate analysis is a qualitative analysis of a borrower's physical and transitional risks as well as a view towards materiality and preparedness to address those risks, should they manifest in actual business disruptions.

This analysis (Climate Risk and Climate Preparedness) is incorporated into our investment memorandums, discussed (when relevant) with our investment committee, and used to support the fundamental research process to ensure that we meet our responsibility to preserve and grow assets as a fiduciary to our clients.

- (B) No, our organisation has not yet integrated climate-related risks and opportunities into its investment strategy, financial planning and (if relevant) products

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
