S&P Short Duration Municipal Yield Index	0.82%	3.78%	4.06%				

The performance data quoted herein represents past performance and does not guarantee future results. Market volatility can dramatically impact the fund's short term performance. Current performance may be lower or higher than figures shown. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Past performance data through the most recent month end is available at www.firsteagle.com or by calling 800-334-2143. The average annual returns are historical and reflect changes in share price, reinvested dividends and are net of expenses. "With sales charge" performance for class A shares gives effect to the deduction of the maximum sales charge of 2.50%. Class I shares require \$1MM minimum investment and are offered without sales charge. Class R6 shares are offered without sales charge. Operating expenses reflect the Fund's total annual operating expenses for the share class of the Fund's most current prospectus, including management fees and other expenses.

1. First Eagle Investment Management, LLC (the "Adviser") has contractually agreed to waive and/or reimburse certain fees and expenses of Classes A, I and R6 so that the total annual operating expenses (excluding interest charges on any borrowings, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, dividend and other expenses relating to short sales, and extraordinary expenses, if any) ("annual operating expenses") of each class are limited to 0.85%, 0.60% and 0.60% of average net assets, respectively. Each of these undertakings lasts until 28-Feb-2026 and may not be terminated during its term without the consent of the Board of Trustees. The Short Duration High Yield Municipal Fund has agreed that each of Classes A, I and R6 will repay the Adviser for fees and expenses waived or reimbursed for the class provided that repayment does not cause annual operating expenses (after the repayment is taken into account) to exceed the lesser of: (1) 0.85%, 0.60% and 0.60% of the class' average net assets, respectively; or (2) if applicable, the then-current expense limitations. Any such repayment must be made within three years after the year in which the Adviser incurred the expense.

2. The Adjusted Expense Ratio excludes certain fees and expenses, such as interest expense and fees paid on Fund borrowings and/or interest and related expenses from inverse floaters. The Fund is currently in a "ramp-up" period, during which it may not be fully invested, and certain of these expenses may change over time.

NAV, Distribution Rate and 30-Day SEC Yield by Share Class

Data as of 31-Mar-2025

	NAV	Distribution Rate	Subsidized 30-Day SEC Yield	Unsubsidized 30-Day SEC Yield
Class A	\$10.30	4.31%	4.63%	4.63%
Class I	\$10.29	4.55%	5.01%	5.01%
Class R6	\$10.30	4.66%	5.05%	5.05%

Allocation by Credit Quality³

Allocation by Sector⁴

Allocation by State⁵

3. Credit rating as represented here, is an assessment provided by a nationally recognized statistical rating organization (NRSRO) or credit worthiness of an issuer with respect to debt obligations, including specific securities, money market instruments, or other bonds. The fund itself has not been rated by an independent rating agency. Credit quality ratings on underlying securities of the fund are received from S&P, Moody's and Fitch and converted to the equivalent S&P major rating category. This breakdown takes the median rating of the three agencies when all three agencies rate a security the lower of the two ratings if only two agencies rate a security and one rating if that is all that is provided. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. Not Rated indicates that the debtor was not rated and should not be interpreted as indicating low quality. Below investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time.

4. Other Sectors includes: General Obligation District (Other) 2.6%, Airport 2.3%, Tobacco Master Settlement Agreement 2.1%, General Obligation 1.8%, Loan Pool 1.6%, Assisted Living 1.4%, Miscellaneous Tax 1.2%, Student Housing 1.0%, Public Power System 0.8%, State Single-Family Housing 0.7%, Not-For-Profit Human Service Provider 0.7%, Local Multi-Family Housing 0.4%, Payments in Lieu of Taxes (PILOT) 0.4%, Sales & Excise Tax 0.3%, Hotel Occupancy Tax 0.3%, Appropriation 0.2%, Water & Sewer 0.1%, General Obligation Hospital/Health District 0.1%, Municipal Utility (Mixed) 0.1%, Indian Tribal Bond 0.1%, Nursing Home 0.1%, Gas Forward Contract 0.1%, Not-For-Profit Cultural Organization 0.1%, Mello-Roos 0.0%, Port/Marina 0.0%, Appropriation (Self) 0.0%, School District 0.0%, Toll Highway/Bridge/Tunnel 0.0%, Telecom 0.0%.

5. Other States includes: Kansas 3.0%, Arizona 2.9%, Maryland 2.6%, Massachusetts 2.5%, Ohio 2.1%, Kentucky 1.8%, Utah 1.7%, Tennessee 1.7%, Minnesota 1.5%, Georgia 1.3%, Colorado 1.2%, Arkansas 1.1%, Oregon 1.0%, Missouri 1.0%, North Carolina 0.7%, Alabama 0.6%, Indiana 0.6%, New Jersey 0.6%, West Virginia 0.6%, Louisiana 0.5%, Michigan 0.5%, Washington 0.5%, Rhode Island 0.4%, Virgin Islands 0.4%, Connecticut 0.4%, American Samoa 0.3%, North Dakota 0.3%, Idaho 0.3%, Mississippi 0.2%, South Carolina 0.2%, District of Columbia 0.1%, Iowa 0.1%, Nebraska 0.1%, Alaska 0.1%, Montana 0.1%, New Mexico 0.0%, Vermont 0.0%.

Portfolio holdings are subject to change and should not be considered a recommendation to buy or sell securities. Based on total fair value of investment. Not a guarantee of future portfolio composition. Current and future portfolio holdings are subject to risk. Percentages may not sum to 100% due to rounding. A debt instrument's "duration" is a way of measuring a debt instrument's sensitivity to a potential change in interest rates. The distribution rate is calculated by the most recent distribution, multiplies it by 12 to get an annualized total, and then divides the result by the NAV for each respective share class. It is the Fund's policy to make periodic distributions of tax-exempt income, net investment income and net realized capital gains, if any. Unless you elect otherwise, such distributions to you will be reinvested in additional shares of the same share class of a Fund at net asset value calculated as of the payment date. 30-day SEC Yield is a standard yield calculation developed by the Securities and Exchange Commission (SEC) that allows for fairer comparisons of bond funds. It is based on the most recent 30-day period covered by the fund's filings with the SEC. The yield figure reflects the dividends and interest earned during the period, after the deduction of the fund's expenses. This is also referred to as the "standardized yield." The number is then annualized. This yield does not necessarily reflect income actually earned and distributed by the Fund, and therefore may not be correlated with dividends and distributions paid. Had fees not been waived and/or expenses reimbursed, the SEC Yield would have been lower.

6. Top 10 holdings represent high yield municipal securities only.

7. A credit rating as represented here, is an assessment provided by a nationally recognized statistical rating organization (NRSRO) or credit worthiness of an issuer with respect to debt obligations, including specific securities, money market instruments, or other bonds. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice. Not Rated (NR) indicates that the debtor was not rated and should not be interpreted as indicating low quality. For more information on the Standard & Poor's rating methodology, please visit standardandpoors.com and select "Understanding Ratings" under Rating Resources.

The Fund intends to declare income dividends daily and distribute them monthly at rates intended to maintain a more stable level of distributions than would result from paying out amounts solely based on current net investment income by paying out less than all of its net investment income or paying out undistributed income from prior months (with any potential remaining deficiencies characterized as a return of capital at year end). To date, the distribution rate has only been derived from the Fund's net investment income and has not included borrowed funds or a return of capital. The distributions might not be made in equal amounts, and one month's distribution may be larger than another. Distribution rate presented excludes any special dividends and indicates the annual rate received if the most recent monthly distribution paid (for each class) was the same for an entire year. The rate represents a distribution and does not represent the total return of the Fund. Because the distribution rate is annualized from a single month's distribution, investors would not necessarily receive this rate amount in a given year. The rate is calculated by annualizing the most recent monthly distribution paid for each class and dividing it by that class's NAV on the last day of the month.

Risk Disclosures

The First Eagle Short Duration High Yield Municipal Fund ("The Fund") is new and may not be successful under all future market conditions. The Fund may not attract sufficient assets to achieve investment, trading or other efficiencies.

Funds that invest in bonds are subject to interest-rate risk and can lose principal value when interest rates rise, while they typically increase their principal values when interest rates decline. Bonds are also subject to credit risk, in which the bond issuer may fail to pay interest and principal in a timely manner, or that negative perception of the issuer's ability to make such payments may cause the price of that bond to decline.

The Fund may invest in high yield, fixed income securities that, at the time of purchase, are non-investment grade. High yield, lower rated securities involve greater price volatility and present greater risks than high rated fixed income securities. High yield securities are rated lower than investment-grade securities because there is a greater possibility that the issuer may be unable to make interest and principal payments on those securities. High yield securities involve greater risk than higher rated securities and portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not.

Municipal bonds are subject to credit risk, interest rate risk, liquidity risk, and call risk. However, the obligations of some municipal issuers may not be enforceable through the exercise of traditional creditors' rights. The reorganization under federal bankruptcy laws of a municipal bond issuer may result in the bonds being cancelled without payment or repaid only in part, or in delays in collecting principal and interest.

All investments involve the risk of loss of principal.

Diversification does not guarantee investment returns and does not eliminate the risk of loss.

Alternative Minimum Tax (AMT) is a tax on items not normally taxed that are imposed by the federal government for individuals who exceed specific income thresholds.

NAV (Net Asset Value) is the month ending price for the various share classes indicated.

S&P Short Duration Municipal Yield Index measures the performance of high yield and investment grade municipal bonds with duration range of one to 12 years maturity.

Subsidized 30-Day SEC Yield includes contractual expense reimbursements and it would be lower without those reimbursements.

Unsubsidized 30-Day SEC Yield excludes contractual expense reimbursements.

Yield to worst is a measure of the lowest possible yield that can be received on a bond that operates within the terms of its contract without defaulting.

Indices are unmanaged and do not incur management fees or other operating expenses. One cannot invest directly in an index.
