Portfolio holdings are subject to change and should not be considered a recommendation to buy, hold or sell securities. Current and future portfolio holdings are subject to risk. The Fund may invest in gold and precious metals through investment in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands (the "Subsidiary"). Gold Bullion and commodities include the Fund's investment in the Subsidiary. Materials may include precious metals, gold miners and gold bullion. Percentages may not sum to 100% due to rounding.

1. Other Countries include: Canada 6.9%.

The performance data quoted herein represent past performance and do not guarantee future results. Market volatility can dramatically impact the Fund's short-term performance. Current performance may be lower or higher than figures shown. The investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Past performance data through the most recent month-end are available at www.firsteagle.com.

Investments are not FDIC insured or bank guaranteed and may lose value.

Risks

All investments involve the risk of loss of principal.

There are risks associated with investing in securities of foreign countries, such as erratic market conditions, economic and political instability and fluctuations in currency exchange rates. These risks may be more pronounced with respect to investments in emerging markets.

ETFs are subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a premium or discount to its net asset value, an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact an ETF's ability to sell its shares. Shares of any ETF are bought and sold at market price (not NAV) and are not individually redeemed from the ETF. Brokerage commissions will reduce returns.

Active share is the percentage of a portfolio's holdings that deviate from its benchmark index. **Net asset value (NAV)** is value of a fund's assets minus its liabilities. Dividing by the total shares outstanding results in NAV per share. **Price-to-book ratio (P/B)** compares a company's stock price to its book value per share. **Price-to-earnings ratio (P/E ratio)** compares a company's stock price to its earnings per share.

MSCI EAFE Index (Net) measures the performance of large and midcap equities across developed markets countries around the world excluding the US and Canada. A net-return index tracks price changes and reinvestment of distribution income net of withholding taxes. **MSCI World Index** (Net) measures the performance of large and midcap equities across developed markets countries. A net-return index tracks price changes and reinvestment of distribution income net of withholding taxes.

Indices are unmanaged and do not incur management fees or other operating expenses. One cannot invest directly in an index.
