Date of Production: 02 April 2026

You are advised to read the information provided here so you can make an informed decision about whether to invest in this Fund.

What is this product?

Type: The Fund is an open-end UCITS fund, whose shares can be bought and sold on any business day on which the New York Stock Exchange is open for regular trading and retail banks are open for business in Dublin.

Term: This investment has no maturity date. This product may be terminated in a limited number of circumstances as set out in the Prospectus.

Investment Objective and Policy: To seek to offer investors long-term growth of capital by investing primarily in shares of U.S. and non-U.S. companies, the majority of which are traded in mature markets and may invest in countries whose economies are still developing.

The Fund invests, under normal circumstances, at least 80% of its net assets in equity securities of U.S. and Non-U.S. companies, seeking, in particular, companies that have financial strength and stability, strong management and fundamental value.

The Fund is actively managed. The Fund may invest in securities, issuers, companies or sectors not included in the Fund's comparative index, namely the MSCI World Index.

The Share Class does not pay any dividends.

The depositary is J.P. Morgan SE, Dublin Branch (the "Depositary").

The Prospectus, the latest annual and half-yearly reports and other information such as unit prices are available free of charge in English at www.firsteagle.com/funds/global-equity-fund#documents.

Intended Investor: The Fund is suitable for investors seeking capital growth over a long-term period and who can tolerate a moderate level of volatility. The First Eagle Global Equity Fund I-UC share class has been selected as being representative of all accumulating share classes listed in the Prospectus.

What are the risks and what could I get in return?

This risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get less back.

Risk and Reward Profile

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product 4 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you. With a category 4 fund, the risk of losing your money is higher but there is also a chance of making higher gains. The Fund is in category 4 because of the above average range and frequency of price movements of the underlying investments. This product does not include any protection from future market performance and therefore you could lose some or the entirety of your investment. For other risks materially relevant to the Fund which are not taken into account in the summary risk indicator, please see the Prospectus available at www.firsteagle.com/funds/global-equity-fund#documents.

The SRI score presented is based on a bespoke track record "Benchmark", comprising the First Eagle Global Equity Fund I-UC share class and the MSCI World Index.

What are the risks and what could I get in return? (continued)

This table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest USD10,000.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance over the last 10 years for the Benchmark. Markets could develop very differently in the future.

The unfavourable scenario illustrates the performance of the Benchmark between 31 Jan 2025 to 31 Mar 2026. The moderate scenario illustrates the performance of the Benchmark between 31 Jan 2020 to 31 Jan 2025. The favourable scenario illustrates the performance of the Benchmark between 31 Mar 2020 to 31 Mar 2025.

What happens if the Fund is unable to pay out?

You may face financial loss should the Manager or the Depositary default on their obligations to the Fund. In the event you suffer any such loss, there is no compensation or guarantee scheme in place which may offset all or any of such loss. In the event of insolvency of the Manager or the Depositary, the Fund's assets are segregated from the assets of the Manager and the Depositary and will not be subject to a claim by the liquidator of the Manager or the Depositary.

What are the costs?

In addition to the costs described below, financial institutions through whom shares in the Fund are purchased and/or the person advising you about this product may charge you fees. This document should, therefore, be read together with any agreement between you and such financial institution or advisor with regard to services they provided, the fees charged for those services and the impact of such fees on your investment over time.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown in the table are illustrations based on a sample investment amount and different possible investment periods as estimated by the Benchmark.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario.
- USD 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	\$86	\$609
Annual cost impact (*)	0.9%	0.9% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 12.9% before costs and 12.1% after costs.

What are the costs? (continued)
